About This Game

20 seconds, constantly changing mechanics and a lot of yelling. These are the keywords that perfectly describe a round of Move or Die, the **4-player friendship ruining party game** where rules change every single round. Slap your friends' controllers out of their hands while playing on the same couch, challenge players online from around the world or pretend to practice offline with AI bots. Select what game modes you want to play from an ever-growing list of developer and community-generated modes, each with their own outrageous mechanics and level design crafted to promote hours of good old friendship-ruining fun.

Play online to gain XP and level up, unlocking awesome characters and game modes in the process, or try to work your way up the daily challenge leader boards where players go against AI bots in survival-like matches. As its name suggests, **Move or Die** forces players to take action. In fact, not moving literally makes your character explode. And, with just 20 seconds per round, Move or Die is a quick game to pick up, but a hard one to put down.

You need friends. This game is tons of fun with friends. 10/10. It's one of those games that looks promising when you watch it, but everyone hates it when you actually play it.

I tried it with 3 of my mates during a local gaming night and after 15 minutes we unanimously decided to change the game. Chaotic and irritating - the game modes change before you can figure out how to play them and get into the game. We felt like randomly running around the place without any sense of purpose.

Might be good to get hyper with your kids or something, but would not recommend for a gaming session with friends and booze.. fun to play home with friends to couch. Its an amazing game to play with friends

DO NOT BUY IT! I've spent more time crashing than playing.
